

Ozone free quartz glass tube. clear, cut surface slight purple.  
The product blocks wavelength <220nm, while transmit over 85% in 253.7nm. Good for all kinds of germicidal lamps.  
Property: Clear quartz tube doped with Ti. It has strong ability to prevent dense UV radiation but release no ozone.  
Application: It is good for all kinds of germicidal lamps.  
Dehydroxylation available upon customer request, OH content less than 15ppm, 5ppm, 3ppm or 1ppm.

Name	Product ID	Glass Type	OH ( ppm )	UV transmission(%)		Type comparison	Typical Application
				190nm	253.7nm
